

Training Strategy Evolution (Best NER → Final NER)

BEST NER (Epoch 7, F1 = 0.860)

- NER-only training on gold + small V2 silver (7,216 examples)
 - LR = 2e-4, 8 epochs, 300-step warmup
- High in-domain F1 (0.860) | Poor cross-domain (57.4% PROPEN recall)
- **Lost linguistic capability (D2 = 0%)**

FINAL NER (Epoch 10, F1 = 0.852)

- STRATEGY 1: Full DCS Sembank Silver (18,855 examples)**
- STRATEGY 2: 15% Linguistic Regularisation (S + L only, 25,627 examples)**
- STRATEGY 4: Lower LR (1e-4), 10 epochs, 500-step warmup**

Result:

- Slightly lower in-domain F1 (-0.8 points)
- **Significantly better cross-domain (+16.0 pp PROPEN recall)**
- **Preserved linguistic capability (S=85%, L=93%)**

KEY TRADE-OFF

In-Domain F1 vs Cross-Domain Generalisation + Linguistic Capability
